

Residential Rebates

About the Program

Saving water is a year-round, 365-day commitment in Southern California. It has to be because our water resources are precious. As a region, we face challenges like climate change, but we can control how much water we use every day. Metropolitan, along with its 26 member agencies across Southern California, offers a variety of rebates to help residents save water inside and outdoors.

Eligibility and Guidelines

Photo courtesy of the Theodore Payne Foundation

Residential water customers within Metropolitan's service area are eligible for rebates. Rebates are subject to change without notice. Visit bewaterwise.com and click on the **residential rebates** tab. It will take you to socalwatersmart.com where you can estimate your rebate.

A residential customer is defined as living in single-family homes or a residence with four or less units.

Be aware that you may not be able to apply again for a product rebate if you have received one in the past. Refer to the list of qualified products provided by Metropolitan that are eligible for rebates.

Customers living in apartments, condominiums, townhomes and mobile homes are eligible for some rebates when installed in individual units.

Metropolitan reserves the right to verify and inspect installation of rebated devices.
